

乗法の計算

春日井市立柏原中学校

名前

1

次の計算をなさい。

$$\textcircled{1} \quad (+3) \times (+6) \\ = + (3 \times 6)$$

$$\textcircled{2} \quad (-1) \times (-6) \\ = + (1 \times 6)$$

$$\textcircled{3} \quad (+5) \times (-3) \\ = - (5 \times 3)$$

$$\textcircled{4} \quad (-4) \times (+7) \\ = - (4 \times 7)$$

$$\textcircled{5} \quad \underline{0} \times (-4)$$

$$\begin{array}{l} (+) \times (+) \} +, \quad (+) \times (-) \} - \\ (-) \times (-) \} +, \quad (-) \times (+) \} - \\ 0 \times \square = 0, \quad \square \times 0 = 0 \end{array}$$

2

次の計算をなさい。

$$\textcircled{1} \quad (+2) \times (+8) \\ = + (2 \times 8)$$

$$\textcircled{2} \quad (-3) \times (-7) \\ = + (3 \times 7)$$

$$\textcircled{3} \quad (-3) \times (+4) \\ = - (3 \times 4)$$

$$\textcircled{4} \quad (+6) \times (-9) \\ = - (6 \times 9)$$

$$\textcircled{5} \quad (-15) \times (+2) \\ = - (15 \times 2)$$

$$\textcircled{6} \quad (+12) \times (-5) \\ = - (12 \times 5)$$

3

次の計算をなさい。

$$\textcircled{1} \quad (-6) \times (-4) \\ = + (6 \times 4)$$

$$\textcircled{2} \quad \underline{+2} \times (-6) \\ = - (2 \times 6)$$

$$\textcircled{3} \quad (-5) \times \underline{+9} \\ = - (5 \times 9)$$

$$\textcircled{4} \quad (+8) \times (+3) \\ = + (8 \times 3)$$

$$\textcircled{5} \quad (-8) \times \underline{+1} \\ = - (8 \times 1)$$

$$\textcircled{6} \quad (-12) \times \underline{0}$$
